

Recommendation Letter

Dear Sir/Madam,

I am writing to you in support of my previous student Omar Abdelgelil for his application to the Intern position at HelloFresh.

As an associate professor at the German University in Cairo in EMS Department, I worked with Omar through different courses across the 5 years of him pursuing the Bachelor degree of Engineering from 2012 till 2017 and advised him during his bachelor thesis project.

Omar has a distinguished polite and cooperative character. He has always shown a strong desire to learn and develop himself. During our class discussions, he proved to have a hard working capability and creative thoughts besides having a charismatic personality during presentations. He has the ability to manage and organize his time and schedule around different activities while keeping a high performance and never missed a single submission deadline during our bachelor thesis preparation. During office hours he often came to visit me to discuss problems, some of which seemed to go beyond the teaching program. Omar is also a good performer in extracurricular activities as he actively participated in supplementary events from sports meetings to science fairs

On a personal level, I have to say that Omar is a very helpful and a decent guy that always cared about other people's well-being and tend to put the time and effort to help with their concerns.

I believe Omar need to work on his flexibility when organizing and planning for a certain task. He is very detail-oriented which in some tasks is required and a lot of people lack this ability of focusing on details. However, he has to learn when to put such efforts in details and when he should allocate those efforts in more important milestones in order to reach the end goal more effectively.

I strongly believe that his perseverance, intellectual ability and enthusiasm for learning and improving himself which were evident in his discussions during the lectures and throughout the courses, are qualities that should help him well in his future career. Therefore I highly recommend that you consider his application as I am sure he will be a great asset to your respectable company.

Regards,

Ass.Prof. Ramy Amir Shawkey
Industrial Automation Department
Faculty of Engineering and Material Science
